ITD State Data Quality Evaluation Results February 2024

This report presents the results of the February 2024 State Data Quality (DQ) evaluation. It also provides background on the purpose, development, and methodology of the State DQ Measures.

ITD DQ Initiative

Data quality is a top priority of the Federal Motor Carrier Safety Administration (FMCSA) and the Innovative Technology Deployment (ITD) Program. The ITD DQ Improvement Initiative was developed by the ITD Support team at the Volpe National Transportation Systems Center (Volpe), in coordination with an ACCB¹ DQ Working Group, to identify and resolve DQ issues. The ITD Support team developed DQ measures, standards, and evaluation methodologies, which were reviewed and accepted by the ACCB. Since June 2015, the ITD Support team has analyzed and reported monthly DQ results to the ITD community. Monthly reports provide DQ ratings generated by:

- The DQ Performance Measures, which rate the quality of IFTA² and IRP³ credential data uploaded by ITD States to SAFER via the T-19 (IFTA Input Transaction) and the T-22 (IRP Registration Input Transaction).
- The DQ Communication Process, which communicates, and monitors correction of, individual Statereported DQ issues.

Purpose and Evolution of the ITD DQ Measures

The purpose of the ITD DQ Performance Measures is not to be punitive, but to highlight data quality issues and prompt States to investigate causes. The measures were designed to address expectations of the ITD Program as well as issues raised by States during program workshops and ACCB meetings; the design was also informed by the DQ Communication Process. Ongoing discussion is encouraged as the measures evolve with the needs of the Program and the ITD community.

See below for a high-level timeline of the development and modification of the ITD DQ Measures. The appendix to this report provides details.

¹ ACCB - ITD Architecture Change Control Board.

² IFTA - International Fuel Tax Association.

³ IRP - International Registration Plan.

Overview of DQ Measures – T-19 (IFTA)

The T-19 DQ Measures rate the quality of IFTA data uploaded by IFTA Commercial Vehicle Information Exchange Window (CVIEW)-certified States to FMCSA's Safety and Fitness Electronic Records (SAFER). Every month, five individual measures and an overall measure are calculated for each IFTA CVIEW-certified State, and ratings are reported. For each individual measure, a rating of Good, Fair, or Poor is generated and a rating value is assigned; the Overall T-19 rating is calculated from the individual rating values.

Individual Measures - T-19

The T-19 Individual Measures, calculated ratings, and rating values are defined below.

T-19 Measures and Rating Calculations/Values - Effective December 2021

Measure	Standard	Method / Data Source	Calculation/Ratings	Rating Value
1 Timeliness: Upload Frequency	Daily uploads	Compare number of T-19 uploads per month to the frequency standard (number of business days in evaluated month). Calculate the percent of upload frequency achieved compared to standard. Source: Daily Reports, sending States.	M1 = # uploads / # business days Good if M1 % >= 100 Fair if 95 <= M1 % <= 99 Poor if 0 <= M1 % <= 94	Good = 3 Fair = 2 Poor = 1
2 Completeness: Successful Uploads	Minimal error rate	Calculate the percent of received T-19 records that were applied to SAFER (not rejected). Source: Log files, counts of received vs applied.	M2 = # applied / # received, 0, if # received = 0 Good if M2 % = 100 Fair if 95 <= M2 % <= 99 Poor if 0 <= M2 % <= 94	Good = 3 Fair = 2 Poor = 1
3 Accuracy: Last Update Date Currency	Update date must not be older than existing data	Calculate the percent of total T-19 records that were not rejected with the error "Older than existing data." Source: Log files. Counts of error message "Older than existing data."	M3 = 100% - (# rejected_error / # received), 0, if # received = 0 Good if M3 % = 100 Fair if 98 <= M3 % <= 99 Poor if 0 <= M3 % <= 97	Good = 3 Fair = 2 Poor = 1
4 Validity: IFTA Exp. Date./ Status	IFTA account exp. date and status must be aligned	Calculate the percent of active T-19 Interstate records (Active account status) that show valid account (exp. date not expired). Source: SAFER database. Query of process time, interstate flag, IFTA exp. date, IFTA status.	M4 = 100% - (# count / # active), 0, if # active = 0 Good if M4 % = 100 Fair if 95 <= M4 % <= 99 Poor if 0 <= M4 % <= 94	Good = 3 Fair = 2 Poor = 1
5 Baseline Frequency	Annual IRP Baseline (minimum)	Source: ITD Support records.	M5 = 2, if exempt M5 = 1, if baseline last 12 mos. M5 = 0, if no baseline last 12 mos.	Good = 3 Poor = 1

Overall Rating - T-19

The T-19 Overall rating is calculated as shown below.

T-19 Overall Rating Calculation – Effective August 2022

Individual T-19 Rating Values	Measure Weights	Overall Rating Calculation	Overall Rating Ranges
Good = 3	M1: Timely Uploads = 15%	(M1 Rating Value * 15%)	Good: 2.7 – 3.0
Fair = 2	M2: Completeness = 30%	+ (M2 Rating Value * 30%)	Fair: 2.3 – 2.6
Poor = 1	M3: Accuracy = 20%	+ (M3 Rating Value * 20%)	Poor: ≤2.2
	M4: Validity = 30%	+ (M4 Rating Value * 30*)	
	M5: Timely Baselines = 5%	+ (M5 Rating Value * 5%)	
		If calculated Overall Rating is <1, = 0	

Overall Ratings – T-19 (IFTA)

All ratings are presented in this report as a rolling three months for comparison purposes. For reference, the chart below shows each State's Core and CVIEW certification status along with its Overall ratings.

State T-19 (IFTA) Overall Ratings December 2023 – February 2024

National Counts of T-19 Overall Rating Ranges December 2023 – February 2024

Dec. Overall Rating	IFTA CVIEW Certified	Jan. Overall Rating	IFTA CVIEW Certified	Feb. Overall Rating	IFTA CVIEW Certified
Good	39	Good	39	Good	42
Fair	5	Fair	3	Fair	3
Poor	2	Poor	4	Poor	1
Total	46	Total	46	Total	46

Note: The CVIEW-certified totals in this table might not equal the total count of CVIEW-certified States due to insufficient data for calculating an Overall rating in any month.

Individual Ratings by State – T-19 (IFTA)

M1 Timeliness: Upload Frequency - T-19

Standard: Daily uploads. Upload frequency equals or exceeds number of business days in the evaluated month.

Frequency Standard = 20: February had 21 weekdays, 1 Federal holiday, and no SAFER down days. **Methodology:** Compare the number of uploads to the frequency standard; calculate the percentage of the

frequency standard achieved by the State.

Source: Daily Reports, 2/1/2024 – 2/29/2024.

Rating Ranges:

Good: ≥ 100%
Fair: 95% – 99%
Poor: ≤ 94%

Overview of DQ Measures - T-22 (IRP)

The T-22 DQ Measures rate the quality of IRP data uploaded by IRP CVIEW-certified States to SAFER. Every month, five individual measures and an overall measure are calculated for each IRP CVIEW-certified State, and ratings are reported. For each individual measure, a rating of Good, Fair, or Poor is generated and a rating value is assigned; the Overall rating is calculated from individual rating values.

Individual Measures - T-22

The T-22 Individual Measures, calculated ratings, and rating values are defined below.

ITD Data Quality Measures - T-22 (IRP) - Effective April 2020

Measure	Standard	Method / Data Source	Calculation/Ratings	Rating Value
1 Timeliness: Upload Frequency	Daily uploads	Compare number of T-22 uploads per month to the frequency standard (number of business days in evaluated month). Calculate the percent of upload frequency achieved compared to standard. Source: Daily Reports, sending States.	M1 = # uploads / # business days Good if M1 % >= 100 Fair if 95 <= M1% <= 99 Poor if 0 <= M1 % <= 94	Good = 3 Fair = 2 Poor = 1
2 Completeness: Successful Uploads	Minimal error rate	Calculate the percent of received T-22 records that were applied to SAFER (not rejected). Source: Log files, counts of received vs applied.	M2 = # applied / # received, 0, if # received = 0 Good if M2 % = 100 Fair if 95 <= M2 % <= 99 Poor if 0 <= M2 % <= 94	Good = 3 Fair = 2 Poor = 1
3 Accuracy: Last Update Date Currency	Update date must not be older than existing data	Calculate the percent of total T-22 records that were not rejected with the error "Older than existing data." Source: Log files. Counts of error message "Older than existing data."	M3 = 100% - (# rejected_error / # received), 0, if # received = 0 Good if M3 % = 100 Fair if 98 <= M3 % <= 99 Poor if 0 <= M3 % <= 97	Good = 3 Fair = 2 Poor = 1 0, else
4 Validity: Vehicle Reg./IRP Status	Vehicle reg. status and IRP status must be aligned	Calculate the percent of active T-22 Interstate records (Active IRP status) that show valid vehicle registration. Source: SAFER database. Query of process time, interstate flag, reg. status, IRP status.	M4 = 100% - (# count / # active), 0, if # active = 0 Good if M4 % = 100 Fair if 95 <= M4 % <= 99 Poor if 0 <= M4 % <= 94	Good = 3 Fair = 2 Poor = 1
5 Baseline Frequency	Annual IRP Baseline (minimum)	Source: ITD Support records.	M5 = 2, if exempt M5 = 1, if baseline in last 12 mos. M5 = 0, if no baseline in last 12 mos. Good if M5 = 1 or 2	Good = 3 Poor = 1
			Poor if M5 = 0	

Overall Measure - T-22

The T-22 Overall rating is calculated as shown below.

T-22 Overall Rating Calculation – Effective August 2022

Individual T-22 Rating Values	Measure Weights	Overall Rating Calculation	Overall Rating Ranges
Good = 3	M1: Timely Uploads = 15%	(M1 Rating Value * 15%)	Good: 2.7 – 3.0
Fair = 2	M2: Completeness = 30%	+ (M2 Rating Value * 30%)	Fair: 2.3 – 2.6
Poor = 1	M3: Accuracy = 20%	+ (M3 Rating Value * 20%)	Poor: ≤2.2
	M4: Validity = 30%	+ (M4 Rating Value * 30*)	
	M5: Timely Baselines = 5%	+ (M5 Rating Value * 5%)	
		If calculated Overall Rating is <1, = 0	

Overall Ratings - T-22 (IRP)

All ratings are presented in this report as a rolling three months for comparison purposes. For reference, the chart below shows each State's Core and CVIEW certification status, along with its Overall ratings.

State T-22 (IRP) Overall Ratings December 2023 - February 2024

Note: The CVIEW-certified totals in this table might not equal the total number of CVIEW-certified States due to insufficient data for calculating an Overall rating in any month.

Individual Ratings by State – T-22 (IRP)

M1 Timeliness: Upload Frequency - T-22

Standard: Daily uploads. Upload frequency equals or exceeds number of business days in the evaluated month. **Frequency Standard = 20:** February had 21 weekdays, 1 Federal holiday, and no SAFER down days. **Methodology:** Compare the number of uploads to the frequency standard; calculate the percentage of the frequency standard achieved by the State.

STATE

MA

МІ

MN

NE

 $\overline{n/a} = Not Applicable$: Not CVIEW Certified or Insufficient Data.

^{*} State is exempt from baselining so receives credit for purposes of calculating the Overall rating.

Additional Information

SAFER Processing Report

The ITD Support team is aware that data quality can be impacted by the availability and timeliness of SAFER processing. The ITD DQ Evaluation report includes the following information about baseline processing and CVIEW production for the evaluated month.

February	Count / Month
Baselining States	6
IRP Only:	0
IFTA Only: GA, MS, OH, TN, VA	5
IFTA and IRP: WI	1
Known Day(s) with Delays in CVIEW Production	0
Known Day(s) with Delays in IDR Production	0

Indicator of Responsiveness to Reported Data Quality Issues

The DQ Communication Process was developed and implemented to collect and report on specific data quality issues found by any State involving another State's data. Volpe collects and communicates State-reported findings, reaching out to responsible States to not only facilitate record correction, but to help the State identify conditions that may contribute to a larger data quality problem. This process depends on State participation, i.e., reporting findings and, if contacted by Volpe, promptly responding to issues. Since June 2014, Volpe has shared counts of reported and resolved issues at ITD Program Manager and ITD ACCB meetings; this indicator supplements that reporting.

Counts of Reported and Resolved DQ Issues

As of 3/19/2024:

- October 2023: 9 States with reported issues. 2/30 pending.
- November 2023: 13 States with reported issues. 1/50 pending.
- December 2023: 4 States with reported issues. 1/4 pending.
- January 2024: 15 States with reported issues. 1/38 pending.
- February 2024: 9 States with reported issues. 7/124 pending.

Note: Starting with December 2022, DQ discrepancies reported by PrePass are included in these counts.

Responsiveness Indicator Criteria

The Responsiveness Indicator is described below in terms of the indicator's standard and methodology, and the status categories of Good, Fair, and Poor. The table that follows lists the status of the current evaluated month along with the previous two months', for reference.

- Standard: Resolve reported issue(s) within 30 days.
- **Methodology:** The number of days between a State being notified by Volpe of a DQ issue and resolving that issue is compared to the 30-day standard.

Responsiveness to Reported Data Quality Issues by State December 2023 – February 2024 Results

Status Categories

- Good: Issue(s) reported and resolved within 30 days.
- Fair: Issue(s) reported during the evaluated month.
- Poor: Reported issue(s) are more than one month old.
- n/a: Not Applicable; no issues reported for that State.

Good: All Reported Fair: Issue(s) Reported in Evaluated Month Poor: Issue(s) More Than One Month Old

State	Core	Dec.	Jan.	Feb.

Appendix: Evolution of the ITD Data Quality (DQ) Measures

Since 2015, the ITD Support team has analyzed State ITD data submitted to SAFER and reported monthly DQ results to the ITD community. The development and modification of the ITD DQ Measures and associated modifications to the monthly DQ report are summarized here.

- June 2015 report: The initial DQ measures evaluated T-22 (IRP Registration Input Transaction).
 Preliminary State ratings based on April 2015 data were presented in June at the FY 2015 ITD Workshop and the first monthly DQ report was published the same month.
- August 2015 report: A new indicator of State responsiveness to individual DQ issues reported to Volpe
 via the DQ Communication Process. Results are NOT included in the Overall Measure rating.
- October 2015 report: A second set of measures like the T-22 measures to evaluate T-19 (IFTA Input Transaction). Note: The introduction of the T-19 measures necessitated a change to the T-22 measure of Baseline Frequency (M5), which did not distinguish between baselines of IRP and IFTA data. Going forward, IRP and IFTA baselines will be tracked and evaluated separately.
- February 2016 report: A modification to the T-19 (IFTA) Measures. In March 2016, the T-19 Validity
 Measure (M4) was reassessed. Given the variations across States in reporting of the measure's
 evaluated fields, an accurate rating could not be assigned to all States; thus, M4 was removed from the
 calculation of the T-19 Overall rating. These changes were implemented with the February 2016
 evaluation, but monthly ratings were adjusted going back to October 2015.
- April 2020 report: Modifications to the T-22 (IRP) Measures. By 2019, State ratings had improved significantly. While most States were regularly achieving Good Overall ratings, there was room for improvement. Modifications raised the bar of rating categories for the Timeliness (M1), Completeness (M2), and Validity (M4) measures, and adjusted the calculation of the Overall rating to put more emphasis on successful uploads (M2).

Adjusted Calculation of T-22 Overall Rating - April 2020

T-22 Measure	Previous Weight	New Weight
M1	20%	15%
M2	20%	30%
М3	20%	No change
M4	30%	No change
M5	10%	5%

Changes to Selected T-22 Individual Rating Ranges - April 2020

T-22 Measure	Good Rating	Fair Rating	Poor Rating
M1 Timeliness	Previous: ≥ 100% April 2020: No change	Previous: 77-99% April 2020: 95-99%	Previous: ≤ 76% April 2020: ≤ 94%
M2 Completeness	Previous: 96-100% April 2020: 100%	Previous: 90-95% April 2020: 95-99%	Previous: ≤ 89% April 2020: ≤ 94%
M4 Validity	Previous: 100% April 2020: No change	Previous: 90-99% April 2020: 95-99%	Previous: ≤ 89% April 2020: ≤ 94%

• September 2021 report: Modifications to the T-19 (IFTA) Measures. On June 1, 2021, to ensure consistent data for the T-19 Validity Measure (M4), the "IFTA account expiration date" field was made mandatory in SAFER. After a three-month preview period, all CVIEW-certified, non-exempt States began receiving an M4 rating and the M4 measure was again included in the T-19 Overall rating calculation. (See "February 2016 report" above for background.)

Adjusted Calculation of T-19 Overall Rating - September 2021

T-19 Measure	Previous Weight	New Weight
M1	30%	15%
M2	30%	No change
М3	30%	20%
M4	Excluded	30%
M5	10%	5%

• **December 2021 report:** Modifications to the T-19 (IFTA) Measures. By late 2021, while most States regularly achieved Good Overall T-19 (IFTA) ratings, there was room for improvement. Modifications implemented with the December 2021 evaluation raised the bar of rating categories for the Timeliness (M1), Completeness (M2), and Validity (M4) Measures to align with the T-22 (IRP) Measures.

Changes to Selected T-19 Individual Rating Ranges - December 2021

T-19 Measure	Good Rating	Fair Rating	Poor Rating
M1	Previous: ≥ 100%	Previous: 77-99% Dec. 2021: 95-99%	Previous: ≤ 76%
Timeliness	Dec. 2021: No change		Dec. 2021: ≤ 94%
M2	Previous: 96-100%	Previous: 90-95% Dec. 2021: 95-99%	Previous: ≤ 89%
Completeness	Dec. 2021: 100%		Dec. 2021: ≤ 94%
M4 Validity	Previous: 100% Dec. 2021: No change	Previous: 90-99% Dec. 2021: 95-99%	Previous: ≤ 89% Dec. 2021: ≤ 94%

• August 2022 report: Modifications to both the T-19 (IFTA) and T-22 (IRP) Measures. As a follow-on to the December 2021 changes, the rating ranges for both Overall Ratings were adjusted to raise the bar of the Good, Fair, and Poor ratings.

Adjustments to Overall Rating Ranges - August 2022

Good Rating	Fair Rating	Poor Rating
Previous: 2.5 – 3.0	Previous: 2.0 – 2.4	Previous: ≤ 1.9
Aug. 2022: 2.7 – 3.0	Aug. 2022: 2.3 – 2.6	Aug. 2022: ≤ 2.2
